### Question 1: What is Science?

**Answer:** Science is about looking at things, asking questions, and doing experiments to understand how everything works. It is a way of thinking, observing and doing things to understand the world we live in and to uncover the secrets of the universe

### Question 2: What will we explore with the help of this book?

**Answer:** With the help of this book, we will explore many interesting ideas. We will do simple experiments and make new discoveries. We will learn how these ideas are linked to our daily life. We will study planet Earth and its environment. We will also learn how plants and animals live and grow.

### Question 3: How can we try to find answers to our questions on our own?

**Answer:** We can find answers to our questions by observing or asking more questions. We can make guesses and test them by doing experiments or observing more. If one guess is wrong, we try another. This way, we learn by thinking and trying on our own.

### Question 4: After all, to be a wise person, you must be a “whys” person!

**Answer:** To be a wise person, We must keep asking “why” about things around you. We should try to find answers by thinking, exploring, and asking questions. If we cannot find the answer alone, we can ask our friends. Science is fun when we discover things together. Keep exploring and never stop asking questions.
